My dear Sam:

I am this moment in receipt of your
Reg. of date, reading as follows. "Meeting held
and programme recommended carried out.
Five cents levied: all of which is satisfactory.
I was cordially willing for the ten cent levy &
it would have carried the additional fore-
mentioned in one of your late letters, but the small
assessment shows the absence of any disposit-
ion to crowd stockholders and the amount which
it will furnish will pay existing indebted-
ness and carry us along until the Board can meet
again and consider the situation. I wish
you would let Geo. send me by early mail a bal-
ance from the Stock ledger as the stock list
will stand, in detail, for this assessment."

I was at Ed's with Mamma last night and ex-
pect to go to Abbecon with her this afternoon
he came up on Sat. m'g last and has been in
Bedia where we left all week ^{for the} past m'g. The
herry Maunts are all poorly again, but I
want Faith is much better after late attack

Morton writes me that the Mammoth is opened up in as good shape as it can be and a fair opinion can be formed of its extent to the tunnel. "There is so much quartz in sight that a little more or less will cut no figure". The weather is just dreadful the heat has been from 96 to 108 every day for ten days and no sign of a change yet.

There are two points where I wish him to press his work a little further and I have instructed him to keep a couple of men for that purpose, but by the end of this month we must consider the mine in condition to hold in at a quantity we can decide upon the prices for treating its ores.

When will you have reached the objective point at Jameison Mine which we proposed for June 1st? Will it be Aug 1st or later? You may probably ask which objective point? I will leave this for you to determine. Is there any point now within our reach to which we can clean up and then circumscribe?

Mamma and others wished me to send their love when I next wrote you. Ever off. yr father, M. T. Hayes.
